

Complete Web Development Beginner Tasks

(For your brother – HTML Basics Practice)

This document contains all three tasks in the correct updated order:

- Task 1 – <abbr> and <address>
- Task 2 – HTML Lists (ol, ul, dl)
- Task 3 – Final Combined Portfolio Assignment (all topics)

TASK 1 — Using <abbr> and <address> Tags

Goal:

Learn how to show abbreviations and display contact information using semantic HTML tags.

File Name: task1.html

Part A — Abbreviations using <abbr>

1. Add a main heading: "Common Abbreviations".
2. Below the heading, write at least 5 abbreviations using the <abbr> tag.
3. Each abbreviation should have a title attribute with its full form.

Example Visual Output (not exact code):

HTML – HyperText Markup Language

CPU – Central Processing Unit

AI – Artificial Intelligence

USB – Universal Serial Bus

URL – Uniform Resource Locator

Part B — Contact Details using <address>

1. Add a second heading: "My Contact Details".
2. Use the <address> tag to wrap the contact info.
3. Inside <address>, include:
 - Your name
 - Email address
 - Phone number
 - City / Location

Example Visual Output:

Nethaji

Email: abc@example.com

Phone: 9876543210

Tirupati, Andhra Pradesh

=====

TASK 2 — Lists (Ordered, Unordered, Description Lists)

=====

Goal:

Understand and practice all three HTML list types: `<ol>`, `<ul>`, and `<dl>`.

File Name: task2.html

Create one HTML page with three sections:

Section A — Ordered List (Daily Routine)

Use `<ol>` for steps where order is important.

Example Visual Output:

1. Wake up
2. Brush
3. Eat breakfast
4. Study HTML

Section B — Unordered List (My Hobbies)

Use `<ul>` for items where order does not matter.

Example Visual Output:

- Playing cricket
- Coding
- Watching movies
- Reading books

Section C — Description List (Tech Glossary)

Use `<dl>` with `<dt>` for the term and `<dd>` for the description.

Example Visual Output:

HTML

→ Structure of web pages

CSS

→ Used for styling web pages

Browser

→ Software used to view websites like Chrome or Edge

=====

TASK 3 — Final Combined Assignment

“My Personal Portfolio — Level 1”

=====

Goal:

Build a small portfolio webpage using ALL topics learned so far:

- Basic HTML structure
- <title>
- Meta tags: author, description
- Favicon link (image/x-icon)
- Headings (h1, h2)
- Paragraphs (p)
- Bold ()
- Italic (<i>)
- Line breaks (
)
- Horizontal line (<hr>)
- HTML entities (, <, >, ©)
- <abbr> for abbreviations
- <address> for contact info
- , , <dl> for lists

File Name: task3_portfolio.html

Section 1 — Head Section

In the <head> of the HTML page, include:

- <title>My Portfolio – Level 1</title>
- <meta name="author" content="Your Name">
- <meta name="description" content="This is my first simple portfolio page.">
- Optional: <link rel="icon" type="image/x-icon" href="favicon.ico">

Section 2 — Main Heading

Add an <h1> heading inside <body>:

“My First Web Portfolio”

Section 3 — About Me

Create one or two paragraphs using:

- <p> for paragraphs
- to highlight your name or “web development”
- <i> for lighter details
-
 to break lines
- At least 2 HTML entities such as <, >, ©,

Example Visual Output Idea (not exact code):

Hi, my name is **Your Name**.

I am learning **web development** step by step.

I enjoy practicing HTML <tags> and building simple pages.

Section 4 — Technologies I Learn (Abbreviations)

Add a small heading and use <abbr> for at least 5 tech terms.

Section 5 — My Contact Details (address)

Use <address> to show:

- Your name
- Email
- Phone
- City/Location

Section 6 — Lists Section

Add three list blocks in this portfolio page:

- An ordered list () for “My Daily Study Plan”
- An unordered list () for “My Skills”
- A description list (<dl>) for “Important Technical Terms”

Section 7 — Footer

At the bottom of the page:

- Add an <hr> line
- Add a final line like: © 2025 My Portfolio | All rights reserved.

What Your Brother Will Learn Overall:

- How to structure a complete HTML page
- How to use semantic tags (<abbr>, <address>, lists)
- How to combine text styling, entities, and lists
- How to build a simple but meaningful “portfolio” page as a beginner
