

Task 3 – Detailed Web Development Assignment

Title: Create a “Mini Bio” Web Page

Objective:

This task helps beginners understand how to combine basic HTML elements such as headings, paragraphs, line breaks, bold text, horizontal lines, meta tags, and HTML entities to create a simple webpage.

Step 1 – Create the File

- Open VS Code
- Click File → New File
- Save the file as: *task3.html*

Step 2 – Add Basic HTML Structure

Start with the standard HTML5 structure:

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8">
    <title>My Mini Bio</title>
  </head>
  <body>

  </body>
</html>
```

Step 3 – Add Meta Tags

Insert the following inside the <head>:

- <meta name="author" content="Your Name">
- <meta name="description" content="This is a simple mini bio webpage created for practice.">

Step 4 – Add Favicon (Optional)

If you have a favicon file:

- <link rel="icon" type="image/x-icon" href="favicon.ico">

Step 5 – Add Visible Content inside <body>

Use these elements:

- <h1> for title
- <p> for paragraphs

- for bold text
-
 for line breaks
- <hr> for horizontal line
- HTML entities such as ©, , <, >

Example Content Structure:

<h1>My Mini Bio</h1>

<p>

Hi, my name is Your Name.

I am learning web development step by step.

This is my first simple mini bio page.

</p>

<p>

My hobbies are:

- Watching movies

- Playing games

- Learning new things about computers

</p>

<p>

My future goal is to become a skilled web developer and build useful websites.

</p>
